

LithiumORE (ORRP)

Lithium Explorations and Production in Railroad Valley, NV

LithiumOre (ORRP)

A lithium resource exploration and development company, whose primary focus is the establishment of a low cost, long life, proved production base to supply the rapidly growing and currently flourishing lithium-ion battery industry for both mobile devices and laptops, as well as the burgeoning EV (electric vehicle) industry.

Strong Demand

Used in batteries inside many new tech items including phones, computers and cars. Demand will continue to grow alongside electric cars and high capacity electric storage.

Lithium is poised to be one of the tightest global markets in terms of supply for at least the next decade. A number of major global economies are now mandating 100% EVs by 2040.
